WORK EXPERIENCE

Personal Startup

Founder & Developer

May 2025 - Present

Currently developing two products in EdTech and AI Productivity sectors. Handling all aspects including user research, architecture design, UI/UX, frontend development, backend development, API creation, AI integration, and mobile development. This hands-on experience is enhancing my understanding of real-world development scenarios, system design, and new skills acquisition.

- Conducted comprehensive user research to inform product features
- Designed scalable system architecture for both products

EDUCATION

Shivalik College of Engineering, Dehradun

BTech in Computer Science & Engineering

Jul 2023 - Jun 2026

Govt. Polytechnic Kashipur

Diploma in Computer Science & Engineering

Jul 2021 - Jun 2023

Pt. G. B. Pant I C Kashipur

Intermediate (Class XII)

Jun 2021

PROJECTS

Portfolio Website ([codeverb.in](#))

Designed and developed a personal portfolio website to showcase projects, certifications, and technical achievements. Built with a focus on clean UI, performance, and responsive design to present professional growth effectively.

Android Music Player ([Melody](#))

Developed a feature-rich Android music player in Java with an intuitive UI, supporting offline playback of local audio files. Implemented smooth navigation, customizable playlists, and enhanced user experience, showcasing hands-on expertise in Android development.

Quiz App

Developed a Java-based Quiz App with Firebase integration, supporting real-time student and teacher logins via email/password. Implemented MCQ tests, live score tracking, and dynamic data storage, demonstrating hands-on experience with mobile app development and cloud databases.

Windows Music Player ([MusicHub](#))

Developed a Windows-based music player using Python, Tkinter for GUI and Pygame for audio playback. Implemented offline audio playback, playlist management, and interactive controls, showcasing hands-on experience in desktop app development and Python GUI programming.

Port-Scanner

Developed a Python-based port scanner to audit network services and identify open ports for security assessment. Built with efficient socket probing and reporting features, used for authorized vulnerability discovery and penetration testing practice.

SKILLS

Mobile & Web Development – Flutter, React Native, Kotlin, Jetpack Compose, Next.js, React.js, JavaScript, Tailwind CSS, HTML

UI/UX Design – Figma, Prototyping, Wireframing, User-Centered Design

Version Control & Deployment – Git, GitHub, Vercel, Netlify, Cloud Platforms

Testing & Security – Jest, Insomnia, Debugging, Secure Coding, Authentication, Vulnerability Assessment

AI/ML & Databases – AI/ML Integration, Model Deployment, MySQL, MongoDB, Firebase, Supabase

System Design / Architecture – Scalable Systems, Microservices, Node.js, Python, Java
